UBERDOC FOR GROUPS, HOSPITALS + SYSTEMS

Reduce Overhead & Improve Patient Satisfaction

What is UBERDOC?

UBERDOC is a healthcare platform that connects patients to doctors for priority in-person and/or telemedicine appointments for a guaranteed price. No network restrictions, delays, or referrals needed.

UBERDOC Provides Immediate Value to You + Patients

Patients use UBERDOC to search and find doctors in your hospital system based on the specialty, proximity and availability. Patients then choose the doctor best suited for their needs and schedule, and pay the up-front cost with their HSA, FSA or credit card.

Your doctor receives a notification that an UBERDOC patient has scheduled an appointment. Once the appointment has been accepted by the doctor, we handle the rest -- billing, collecting payment and sending email reminders -- without any intervention from administrative staff or need for integration with Electronic Health Records.

Why Hospitals Should Choose UBERDOC

Our transparent pricing model is compliant with the latest Price Transparency regulations from CMS, allowing hospital systems to easily show the public they are willing to accept new patients to their top specialists at a transparent price.

Immediate Payment - Reduces billing cycle to ZERO for all UBERDOC patients.

No Insurance Red Tape - Eliminates the need for insurance forms from patient onboarding. Insurance can be used for any subsequent care.

Direct-Pay Patients - Drives new direct-pay patients to your doctors and providers.

Why Patients Love UBERDOC

We empower patients to prioritize their health, putting the power back in their hands with our easy-to-use platform that directly connects them to your doctors and specialists.

Convenient - No phone calls, waiting, referrals, or network restrictions.

Transparent - No monthly fee or annual membership. Transparent price with no surprise bills.

Simple - Intuitive platform that is accessible from any device.
